Tbilisi, Georgia

Former Apple Data Analyst turned Web Developer with experience making React eCommerce stores, websites and various JavaScript-based apps. Armed with an extensive knowledge of the web stack, mainly front-end but also back-end.

## WORK EXPERIENCE

### Web Developer
Freelance | 2018 - Present

Since finishing at Apple in 2018, I travelled to Eastern Europe and am now based in Tbilisi, Georgia. Since 2018 I have combined deep study of web development with travel. I have a solid, self-taught education in web development and am building projects such as eCommerce stores. Please see my portfolio at gavincrowley.dev.

The React / JavaScript ecosystem is my focus, however I also have experience with Wordpress and Shopify.

### Data Analyst
Apple | 2016 - 2018

Updating and management of B2B CRM data across EMEIA with the Sales BPR & Systems team.

My two years working at Apple's European HQ mean't I got extensive experience in:

- working with stakeholders on many levels and countries
- MS Excel and project management tools
- various CRM systems

### Musician/Tutor
Togher Music School | 2010 - 2011

Was part of a community employment scheme where I was tutored in guitar and music theory. I in turn, tutored students in guitar and piano privately.

### Baker
Arbutus Bread, Cork | 2008 - 2009

Worked with all aspects of baking at this award winning artisan bakery in Cork city. Was involved in mixing, shaping, baking, preparation of orders and learned how bread of the highest quality is produced.

### Fundraiser
Concern Worldwide | 2004 - 2008

Signed up almost 1000 members of the public for monthly donations that contribute to Concern's overseas emergency and development work. Promoted to role of Team Leader where I supervised, motivated and advised a team of fundraisers.

## PROJECTS

### React eCommerce Store

Built a clothing eCommerce store with React which features a collection and product pages, an updatable cart, PayPal integration and hosted on Netlify.

### React Native News App

A news app built in React Native using the News API as a data source. Developed using the Expo CLI.

### Github Finder App

Used the Github user API to create an app that allows the user to search for Github user information. Developed with JavaScript ES6+ and hosted with Surge.
